

Aquatite Enterprises Ltd
Stand TBA

Aquatite Enterprises Ltd is an innovative New Zealand company who have designed a unique solution for sealing the penetrations in wet area linings. The Aquatite Wetwall Caddy is a two piece ABS and Polycarb device that encompasses shower mixers and taps and creates a seal in a wet wall lining, diverting any moisture that has ingressed past the linings or entered the wall cavity from hardware failure back out the front of the device and down the face of the wall lining, alerting the homeowner to the fact that they have a leak, while preventing any water damage from occurring. The Wetwall Caddy also allows for easy access back into the shower mixer for servicing, this is a requirement from all tapware manufacturers for warranty purposes. All of the Aquatite products are Branz appraised and have a 50 year warranty they also meet and exceed the requirements of E2 and E3 of the NZBC and AS 3740 waterproofing of wet areas in residential buildings.
