

Ecoglo International Ltd
Stand 35

Ecoglo products can be used to meet the requirements of Clause F6 Visibility in Escape Routes, Clause F8 Signage and Clause D1 Access. Ecoglo uses advanced photoluminescent technology to create products that are visibly better in light, dark and dim conditions and provide visibility from 10metres for emergency black out situations. Highly durable and anti-slip they can be used both indoors and outdoors for permanent application. A wide range of contrast strips, step nosings, handrails markers, aisle markers and egress signs are available. Ecoglo can design a complete emergency system and provide a PS 1 report.
