

**NZ Ready Mixed Concrete Association  
Stand 11**

**Quality Concrete for New Zealand**

The hallmark of concrete quality is established through the NZ Standard 3104 ensuring that concrete meets the requirements of the NZ Building Code. All NZRMCA members work to NZS 3104 and the quality assurance requirements are vetted by an independent group of professional engineers. The group includes nominations from IPENZ and Concrete Society. Each plant submits information to the Plant Audit Group for annual evaluation of results and a bi-annual plant inspection.
