

**Reliance Worldwide  
Stand 26**

Reliance Worldwide NZ Ltd is part of large group that manufactures, imports and distributes plumbing and fire related equipment, with factories and offices in Australia .New Zealand , United States ,United Kingdom ,France and Hong Kong. RWW NZ has introduced Tempering .Expansion, limiting and backflow valves into New Zealand to name a few.

We have on the stand a new inlet control valve for dwellings that has four valves in the assembly plus an equal pressure outlet if required. We also have a new designed backflow reduced pressure zone device that is unique.

A tenant valve assembly is also on show that has all the components of the new inlet valve but has an extra check making it a dual check for backflow plus the facility to screw a water meter into the body making it an ideal unit to be used in apartments. Meters available can be read at the meter or remotely through a PC on site or off site using a modem.
