

**The Step Up Group
Stand 17**

Driven by innovation and following years of building science research The STEP UP GROUP provides ground breaking investigative techniques allowing for accurate diagnostics, early detection and intervention, post treatment of framing, verifiable monitoring and management tools for surety of performance, sustainable and affordable solutions for defective buildings and an unsurpassed quality assurance process.

This extends into meaningful protection for all stakeholders.

The STEP UP GROUP was formed through a vision and an industry need for a holistic approach to construction, maintenance and building management.
