

# BUILDING PULSE 2020 EXHIBITORS.

## Stand One.

### TRACKLOCK

SILVER PARTNER

TRACKLOCK® Ltd has been providing pre-engineered, off the shelf products to ensure compliance for over seven years.

From the TRACKLOCK® and DEFLOK® range for part height partition walls to the GRIDLOCK® range for suspended ceiling systems – TRACKLOCK® Ltd has the bracing solution.

We appreciate the opportunity to work with local councils, regulators and industry leaders.

BOINZ members are the key to a nationwide understanding of seismic issues and the potential for elegant and cost-effective solutions.

TRACKLOCK® Ltd products allow full compliance under B1 Structure, AS/NZS1170, and the recently updated AS/NZS2785.

TRACKLOCK® solutions provide consistent outcomes due to the internationally accredited testing carried out here in New Zealand and as part of the ICC and OSHPD regimes in the USA.

We believe the opportunity to share this knowledge with BOINZ members will be immediately beneficial for them, their teams and the wider built environment.

## Stand Two.

### PACIFIC STEEL

BRONZE PARTNER

Pacific Steel has been locally manufacturing steel reinforcing products since 1962 and we take great pride in producing quality steel that meets ACRS third-party certification. Come by our stand to see our reinforcing steel in varying grades and sizes and learn more about our distinctive bar marking on Earthquake grade (300E & 500E) SEISMIC® branded reinforcing steel coil, bar and mesh feed.

## Stand Three.

### BRANZ.

BRONZE PARTNER

BRANZ is an independent research organisation providing impartial evidence-based advice on critical issues in building and construction in New Zealand, to industry and government.

We provide testing and consultancy services that drive better performance. We undertake and invest in research by BRANZ science teams and external research agencies to unlock new knowledge, addressing current and emerging challenges of our built environment.

## Stand Four.

### ECOPLY

Ecoply® is New Zealand's leading brand of structural plywood and is manufactured from sustainably-grown New Zealand plantation pine. The Ecoply brand includes a wide range of appearance and performance-rated plywood products providing durability, strength and design flexibility. All Ecoply products are certified to Standard AS/NZS 2269.

GOLD PARTNER

---

## Stand Five.

### SOUDAL

Soudal New Zealand is a new name to many in the New Zealand construction sector. However, for over 20 years we have been the lead supplier of sealants, foams and adhesives to Holdfast NZ under the iconic Gorilla brand. In November 2018 that relationship changed when Belgium based Soudal proudly stepped in to become sole owner of the Holdfast business in New Zealand. That meant the products, brands and service our customers had come to know and love over 35 years were all retained, but we now had the resourcing and support of the global sealants, foams and adhesives giant that is Soudal.

The change has brought many benefits to our customers. With a commitment to quality that is unrivaled and a real focus on the New Zealand market we pride ourselves on creating strong relationships with our customers and providing tailored solutions to meet their needs.

---

## Stand Six.

### RYAN FIRE

Ryanfire Products Ltd. provide NZ with compliant systems and solutions for all things passive fire protection, they are not just a product supplier – but a solution finder, and their extensive library of product test data and technical knowledge supports that.

A New Zealand owned and based company, with 30+ years' experience in passive fire protection put them a step above the rest when it comes to technical support, and that reputation improves by the day with their on-going fire testing regime and product development.

Ryanfire work closely with FPANZ (Fire Protection Association NZ), architects, fire engineers and specialist installers' nationwide to ensure the highest quality of workmanship and compliance is achieved. Get in touch with their friendly staff to find out more and see how they can help you!

Stand Ten.

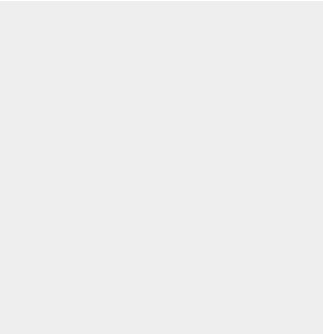

BOINZ

The Institute strives to raise the status and advance the interests of the profession of building surveyors. The Institute encourages members to develop a better understanding of the responsibilities and duties imposed by Acts and regulations. To achieve this, the Institute facilitates opportunities for the members to meet, correspond and interchange knowledge relevant to the science of building control in New Zealand.

## Stand Seventeen.

**INSOL**

As the founder and CEO of Insol Ltd, Greg Simmons has been involved in the façade industry for 17 years. Construction, engineering, and manufacturing are familiar areas, with four generations of family working within these disciplines.

Greg has played an integral part in setting up the advanced processes and facade solutions that Insol now provides, pushing the barriers of quality and design norms. His perfectionist style reflects in the attention to project dynamics and technical consulting on the right selection in facades. In short span, Greg and his team have positioned the company as one of the top façade processors in New Zealand with a special focus on Design, Engineering, and Quality.

With the latest substantial growth Insol has had over the last few years it has allowed a greater focus on research and development. Looking towards the future of Façade solutions, Greg has actively been involved in creating and developing platforms for new ways to test the limits of design.
